# Villa Laura Hospital

*Leaders in Orthopedics since 1958*

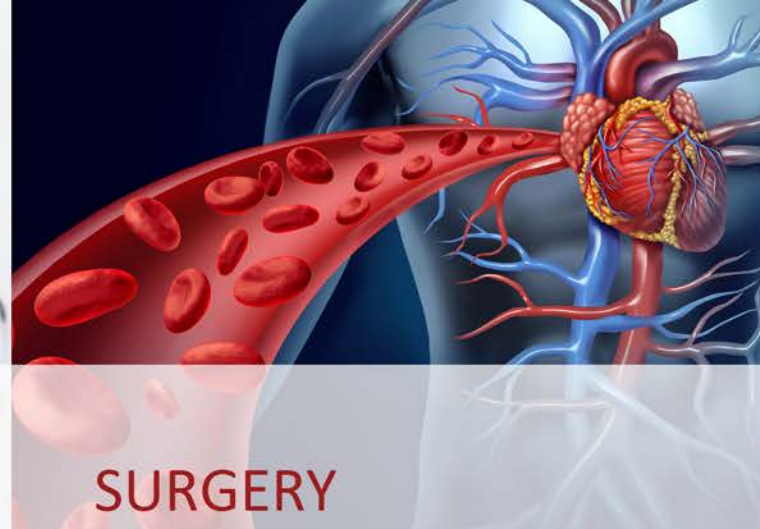

## MEDICINE

Medicine and long-term hospitalization departments at Villa Laura work in collaboration with many hospitals in Bologna, in particular with **S. Orsola University Hospital**, from which many patients are sent.

The departments, led by MD. Luca Arfilli, handle major medical conditions in the different hospital stages, acute and subacute. The unit provides treatment mainly for **cardiovascular, gastroenterological and neurological** problems, with particular attention to **degenerative conditions**.

The unit provides support in the treatment of patients affected by multiple comorbidities, as well as cardiac, respiratory and septic conditions.

Doctors and physicians are particularly aware of **fragility problems** in elderly patients and take particular care in implementing protected discharge programmes.

## SURGERY

With **3.000 procedures performed annually, 2 dedicated wards and 80 beds**, Villa Laura's **Orthopedics department** is the point of excellence among the hospital's wide scope of surgical activities.

The hospital is a reference center at National level for **knee surgery, hip replacement, hand surgery, shoulder surgery and lower limb surgery**, with renowned and **internationally trained physicians** such as **MD. Alessandro Lelli** and **MD. Antonio Moroni**, who bring to Villa Laura modern and non-invasive techniques refined during their training abroad, and host and direct workshops participated by Orthopedic surgeons from all over the world.

Villa Laura is also center of reference for **Ophthalmology**, with an average of **2.000 procedures** carried out annually thanks to 4 highly qualified équipes.

**Plastic and Reconstructive Surgery** at Villa Laura work on congenital or post-traumatic physical problems, and often involve organ and functional reconstruction, with particular attention to the final esthetic result.

## LABORATORY AND DIAGNOSTICS

The laboratory and diagnostics departments work for the Italian National Health Service and privately for individuals and businesses. An average of **500.000 tests** are conducted annually and these include hematological, serological, microbiological, virological and cytological investigations.

The laboratory is therefore equipped to carry out the **complete range of tests** it is possible to conduct. Tests can be done for both in-patients and out-patients.

Private diagnostics and laboratory tests are elaborated **within 24 hours from the reservation**. The main activities are:

- Laboratory Tests
- Radiodiagnostics
- Ecography and Vascular Diagnostics
- Cardiological Diagnostics
